Easier, Faster and Cheaper

Take the work and time out of backfilling with the McCullough Coverup. Do about 60 feet of trench in one minute, not a problem

The 1000 at Work

with the 1000 and do it without disturbing any of the existing turf. The 1000 is made to follow the walk behind trenchers in small areas but is big enough to do the large jobs too.

SIMPLE DESIGN

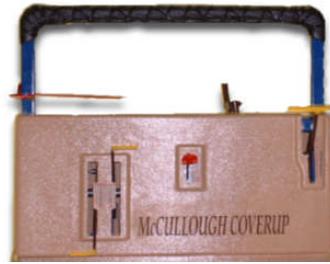

All of the working parts and adjustments can be made with the cover raised. The belt drives

insures a smooth, simple drive to the five speed transaxel and the auger drive box. The use of standard belts and bearings makes maintenance a snap

USER FRIENDLY

The balanced feel of the 1000 makes for easy maneuvering throughout the job from transport to guiding down the ditches, The use of a differential makes turning a snap,

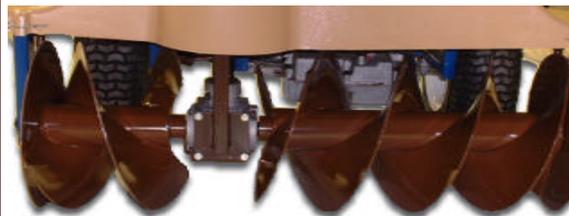

no having to manhandle this machine. The controls are all on top, in easy reach of the operator, even

the handle bar is covered with a soft, comfortable cover

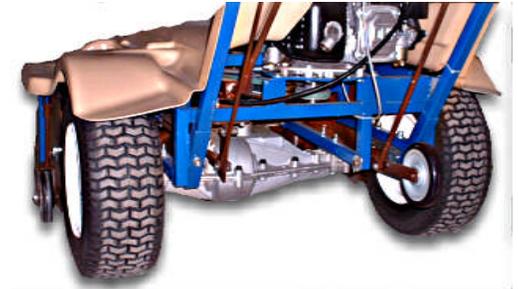

EASY ON HEADS AND THE TURF

The adjustable gage wheels allows you to remove as much topsoil as you want to, right down to the turf with no damage to the turf.

The 4+ inch opening in the auger means that the heads can pass through without damage even if they are above ground

The wide turf type tires are easy on the turf and allows the machine to cross the

ditches easily.

Kawasaki!

What more can we say!

\$\$\$\$\$\$\$\$

MORE PROFIT PER JOB

Do the math! If you can cut time and manpower, get to the next job faster, do more work better and have less comebacks to fill sunken trenches, it has to mean higher profits! Another big advantage is that this worker will be there and ready to work every day.
